SIA JD Marketings
Ritausmas iela 2b
LV-1058 Riga

We hereby declare, with full responsibility, that Mostostal Plus type frame scaffolding were designed and produced in accordance with following standard documents:

1. EN-12811-1:2004 - Equipment for temporary works – part 1 : Scaffoldings – production conditions and general designing.
2. EN-12811-2:2004 - Equipment for temporary works – part 2 : Information concerning raw materials.
3. EN-12811-2:2004 - Equipment for temporary works – part 2 : Research loadings.
4. EN-12810-1:2004 - Facade scaffoldings made of prefabricated elements – part 1: Technical specification of goods.
5. EN-12810-2:2004 - Facade scaffoldings made of prefabricated elements – part 2: Special methods of designing the construction.
6. EN – 74:2002 – Couplers centering pins and footings used in working and load bearing scaffoldings made of steel pipes.
7. EN – 39:2003 – Steel pipes for scaffoldings erection.
8. PN-M-47900-1,2,3:1996 – Standing, metal working scaffolding.

Moreover, we inform that the scaffoldings of our production have many certificates issued for us or our business partners; among others by SP in Sweden. According to our best knowledge Finland is a country without an obligation of certification.
